Modern Social Detroit — SEO Action Plan

Prepared for: Modern Social Detroit | **Domain:** modernsocialdetroit.com
Market: Detroit, MI & Michigan | **Report Date:** April 9, 2026
Data Source: SE Ranking Audit (April 8, 2026), GBP Analysis, Backlink Profile Review

> This action plan translates a full competitive intelligence audit and SEO gap analysis into a clear, prioritized roadmap for modernsocialdetroit.com. Every recommendation below is grounded in audit data and maps directly to measurable ranking and revenue outcomes.

Current Performance Snapshot

Metric	Value
Search Visibility	20.6%
Average Keyword Position	43
% Keywords in Top 10	32%
Organic Traffic Forecast	~104 sessions/month
Local Average Position	12.2
GBP Click-Through Rate	~2.6%
GBP Views	214,538
Google Review Rating	3.8 / 5 (50 reviews)
Audit Issues Found	67
Google Analytics Connected	✗ No
Google Search Console Linked	✗ No
Toxic/Spammy Backlinks	✓ Confirmed (Moldova + Romania)

The site is indexed and has real local visibility — but 214 of 355 tracked local keywords rank outside position 10, and the keyword profile is almost entirely dependent on the homepage doing the job of 7+ pages. Zero corporate or brand activation keywords rank in the top 20.

1. Booking & Conversion Infrastructure

Why it matters: Without a booking system the GBP listing cannot display a "Book" CTA button — one of the highest-visibility real estate features in Google Maps. There are zero trackable conversion events.

Actions:

- Integrate HoneyBook, Dubsado, or Calendly for inquiry and booking
- Connect to Google's Reserve with Google program via a supported scheduling partner
- Add a sticky "Book a Consultation" CTA button on every service page and the homepage
- Configure GA4 conversion tracking for booking confirmations and form submissions

2. Google Analytics 4 & Search Console Setup

Why it matters: All performance data is currently invisible. No keyword data, no conversion data, no Core Web Vitals reports — making it impossible to measure the impact of any SEO work.

Actions:

- Install and verify GA4 property on modernsocialdetroit.com
- Link Google Search Console to the same Google account
- Verify GSC ownership via DNS record or HTML meta tag
- Set up GTM click listeners for phone number and contact form tracking
- Build GA4 custom audiences for remarketing (site visitors, pricing page visitors)

3. Backlink Profile — Toxic Link Disavow

Why it matters: 52.9% of referring domains originate from Moldova (35.3%) and Romania (17.6%) — two of the highest spam-origin countries in SEO. Additionally, 27.5% of all backlinks carry the anchor text "Start Own SEO business," which has zero relevance to a Detroit photo booth business. These links are actively suppressing domain authority and risk triggering a Google manual penalty.

Actions:

- Export full referring domain list from Google Search Console
- Compile a disavow file targeting all Moldova and Romania domains
- Include all links carrying the "Start Own SEO business" anchor text
- Submit disavow file at search.google.com/search-console/disavow-links
- Begin building 10–15 authoritative local Detroit editorial links to replace lost authority

Local Link Building Targets:

- Metro Detroit Chamber of Commerce directory listing
- Crain's Detroit Business — pitch expert commentary or business feature
- Detroit Regional Chamber preferred vendor listing
- TCF Center / Detroit Marriott / Cobo Center venue preferred vendor pages
- Michigan Wedding Network vendor directory
- Detroit event planning blogs — styled shoot features

4. Google Business Profile Optimization

Why it matters: GBP drives 214,538 views and 5,571 website visits — yet the click-through rate is only 2.6%. Several missing elements are suppressing both ranking and conversion.

Missing & Incomplete GBP Elements

Element	Status	Action
Business Hours	✕ Not listed	Add immediately — #1 local pack ranking signal
Booking Link	✕ Missing	Connect after booking system is live
Service Menu	⚠ Incomplete	Add all services with keyword-rich descriptions
Q&A Section	✕ Unanswered	Seed 10 Q&As; answer all proactively
Products with Prices	✕ Missing	Add service packages with price ranges
GBP Post Frequency	⚠ Low	Schedule 2 posts/week minimum
Photo Count	⚠ Below 100	Upload 25+ event and setup photos
Video Content	✕ None	Add 2–3 short event recap videos

Immediate fix: Add business hours today — this is the single highest-impact GBP action available and takes under 5 minutes.

5. Service Landing Pages

Why it matters: The homepage is currently doing the job of 7+ pages — 91% of keyword rankings are concentrated on a single URL. Google cannot rank one page for multiple services across multiple intents. Every missing service page is a missed first-page ranking opportunity.

Pages to Build

Page	Primary Keyword	Secondary Keywords
/corporate-event-photography	corporate event photographer Detroit	corporate photographer Michigan
/brand-activation-photography	brand activation photographer Michigan	experiential marketing photographer Detroit
/photo-booth-rental	photo booth rental Detroit MI	photo booth rental Michigan
/corporate-headshots	corporate headshots Detroit	executive portraits Michigan
/trade-show-photography	trade show photographer Michigan	conference photographer Detroit
/holiday-party-photo-booth	holiday party photo booth Detroit	company party photographer Michigan
/pricing	photo booth rental cost Michigan	corporate event photography pricing Detroit

Page	Primary Keyword	Secondary Keywords
/faq	photo booth rental FAQ Detroit	corporate photography questions Michigan

Each page requires: Unique H1 with primary keyword · 500+ words of optimized copy · FAQ schema · Internal links to related services and pricing · Embedded contact/booking form.

6. City & Location Pages

Why it matters: Zero geo-targeted landing pages exist. Google cannot rank the site for suburb and secondary-city searches when no pages target those markets — and Michigan has dozens of high-value event markets beyond Detroit proper.

Location Pages to Create

Page	Target Keyword
/photo-booth-rental-ann-arbor	photo booth rental Ann Arbor MI
/photo-booth-rental-grand-rapids	photo booth rental Grand Rapids Michigan
/photo-booth-rental-troy-mi	photo booth rental Troy Michigan
/corporate-photographer-metro-detroit	corporate photographer metro Detroit
/event-photography-dearborn	event photographer Dearborn MI
/photo-booth-rental-warren-mi	photo booth rental Warren Michigan
/photo-booth-rental-livonia	photo booth rental Livonia MI
/brand-activation-michigan	brand activation photographer Michigan

Each page requires: Unique localized H1 · 150–300 words of geo-specific body copy · Embedded Google Map · NAP information · LocalBusiness schema markup · Internal links to service pages.

7. On-Page SEO Fixes

Title Tags & Meta Descriptions

All 10 flagged underperforming pages require complete rewrites.

Formula:

- Homepage: `Photo Booth Rental Detroit | Corporate Event Photography | Modern Social Detroit`
- Service pages: `[Service] in [City] | Modern Social Detroit`
- All meta descriptions: 150–160 characters, include primary keyword, end with a call to action

Heading Structure

Multiple pages have no H1 tag or multiple H1 tags. H2/H3 hierarchy is flat with no keyword strategy.

Rule: One H1 per page containing the primary keyword. H2 for each major section with secondary keywords. H3 for supporting details only.

Image SEO — Three Compounding Problems

1. **File names** — Rename from camera defaults (`DSC_0047.jpg`) to descriptive slugs (`photo-booth-rental-detroit-corporate-event.jpg`)
2. **Alt text** — Add descriptive alt text to every image; currently missing sitewide
3. **File format & size** — Convert all images to WebP; compress for Core Web Vitals compliance

Schema Markup — Currently 100% Absent

Schema Type	Where	Benefit
`LocalBusiness`	Homepage	Google Knowledge Panel with NAP + geo
`Service`	Each service page	Rich results for service queries
`FAQPage`	FAQ + pricing pages	Featured snippet / PAA eligibility
`BreadcrumbList`	Sitewide	Navigation rich results in SERP
`AggregateRating`	Homepage + service pages	Star ratings visible in search
`ImageObject`	Portfolio gallery	Google Image Search visibility

8. Local SEO — Citations & Reviews

NAP Citation Fixes

Six confirmed NAP errors across major directories. Google cross-references business name, address, and phone across the web — inconsistencies lower local authority scores and directly suppress local pack rankings.

Directories Requiring Fixes: Yelp · Bing Places · Apple Maps · Foursquare/Factual · YellowPages · Angi

Review Generation System

Current rating: 3.8/5 from 50 reviews — below the 4.5+ threshold preferred for local pack dominance. No systematic review request process exists.

System to Build:

- Create a short review request URL from the GBP dashboard

- Post-project email sequence: job complete → 3-day follow-up → 7-day final ask
- QR code on all printed delivery materials linking to the review page
- Respond to every existing review — response rate is a direct local ranking signal
- Target: 15+ new reviews within 60 days, pushing rating above 4.2

9. Content Strategy

Blog / Content Hub

Zero content is being published. Every competitor with a blog compounds their keyword footprint monthly.

Target cadence: 2 posts/month minimum · 800–1,200 words each · Every post internally linked to the most relevant service page

Blog Topic	Target Keyword	Intent
How to Plan the Perfect Corporate Event in Detroit	corporate event planning Detroit	Commercial
360 Photo Booth vs. Mirror Booth: Which is Right?	360 photo booth detroit	Commercial
Best Corporate Event Venues in Detroit	corporate event venues Detroit Michigan	Commercial
What to Expect from Brand Activation Photography	brand activation photographer Michigan	Commercial
How Much Does a Photo Booth Rental Cost in Michigan?	photo booth rental cost Michigan	Transactional
Holiday Party Photo Booth Ideas for Detroit Companies	holiday party photo booth Detroit	Seasonal
Top Trade Show Photography Tips for Michigan Exhibitors	trade show photographer Michigan	Informational

About Page — E-E-A-T Signals

Google rewards Experience, Expertise, Authority, and Trust. The current About page is missing every signal.

What to add: Founder/team bio with years of experience and notable client list · Logos of recognizable corporate clients served · Press mentions or award recognitions · Industry association memberships · Behind-the-scenes event photos

10. Technical SEO

Core Web Vitals

Metric	Status	Target	Fix
LCP (Largest Contentful Paint)	Likely >4s	<2.5s	Compress hero images; convert to WebP
INP (Interaction to Next Paint)	Unknown	<200ms	Remove/defer unused JavaScript
CLS (Cumulative Layout Shift)	Likely >0.1	<0.1	Set explicit width + height on all images

Additional Technical Issues

- XML sitemap likely not submitted to Google Search Console — new pages may not be indexed promptly
- 67 unresolved audit errors: broken internal links, missing canonical tags, duplicate content, pages blocked in robots.txt
- Missing Open Graph and Twitter/X Card meta tags — social share link previews are broken sitewide
- No structured data implemented anywhere on the site (covered in Section 7)

Priority Roadmap

This Week — Do Immediately (0–7 days)

Action	Est. Time	Impact
Add business hours to GBP	5 min	Immediate local pack improvement
Connect GA4 + Google Search Console	1 hr	Unlocks all performance data
Submit disavow file for Moldova/Romania backlinks	30 min	Stops active link penalty risk
Fix 6 NAP citation errors across directories	2 hrs	Local authority foundation
Respond to all existing GBP reviews	1 hr	Engagement signal to Google

Month 1 — High Impact

Action	Effort
Integrate booking system + connect Reserve with Google	Medium
Build 5 dedicated service landing pages	Medium
Add schema markup sitewide (LocalBusiness, Service, FAQ, AggregateRating)	Medium
Rewrite all title tags and meta descriptions	Easy
Create pricing / packages page	Easy

Action	Effort
Upload 25+ GBP photos; launch 2x/week GBP posting schedule	Easy
Launch post-project review generation email sequence	Easy
Compress and convert all images to WebP; add alt text sitewide	Medium

Month 2 — Growth Phase

Action	Effort
Create 8 city/location pages targeting Michigan markets	Medium
Fix Core Web Vitals (LCP, CLS priority)	Medium
Build FAQ page with FAQPage schema markup	Easy
Rename all image files with descriptive keyword slugs	Medium
Resolve 67 technical audit errors	Medium
Fix Open Graph + social share meta tags sitewide	Easy

Month 3+ — Compounding Returns

Action	Effort
Launch blog — 2 optimized posts per month	Ongoing
Build local editorial backlink campaign (Detroit/Michigan press + venues)	Hard
Target holiday and seasonal corporate event keywords	Medium
Create dedicated 360 booth and trade show pages	Medium
Build About page with full E-E-A-T content and client logos	Easy
Build testimonials / case studies page with real client outcomes	Medium

90-Day Targets

Metric	Current	90-Day Target
Search Visibility	20.6%	35%+
Average Keyword Position	43	Under 20
% Keywords in Top 10	32%	50%+
Local Average Position	12.2	Under 8
GBP Click-Through Rate	2.6%	6%+
Local Pack Top 1–3 Keywords	45	75+

Metric	Current	90-Day Target
Google Review Rating	3.8 / 50 reviews	4.2+ / 65+ reviews
Toxic Links Disavowed	0	100% of Moldova/Romania domains
Corporate Keyword Rankings	0 top-20	5+ corporate terms in top 20
Organic Sessions/Month	~104	200+
Booking Conversions Tracked	0	Fully tracked in GA4
Total Indexed Optimized Pages	Low	20+

Report compiled April 9, 2026. All data sourced from SE Ranking audit (April 8, 2026), Google Business Profile analysis, backlink profile review, and competitive landscape research for the Detroit, Michigan market. Domain: modernsocialdetroit.com.
